Dr. Linda J. Harris is a Cooperative Extension Specialist who specializes in microbial food safety throughout the food chain with a focus on the microbiology of fresh fruits and vegetables and tree nuts. She will be doing a presentation on Tuesday, March 15th:

- From 10:00am to 11:00am Dr. Linda J. Harris will present a 1 hour discussion on food safety regulations in the context of pre- and postharvest activities that reduce food safety risks, with a focus on agricultural water and the Produce Safety Rule.

This is a wonderful, FREE opportunity to gain evidence-based information on food safety.
